Commercial Ceilings

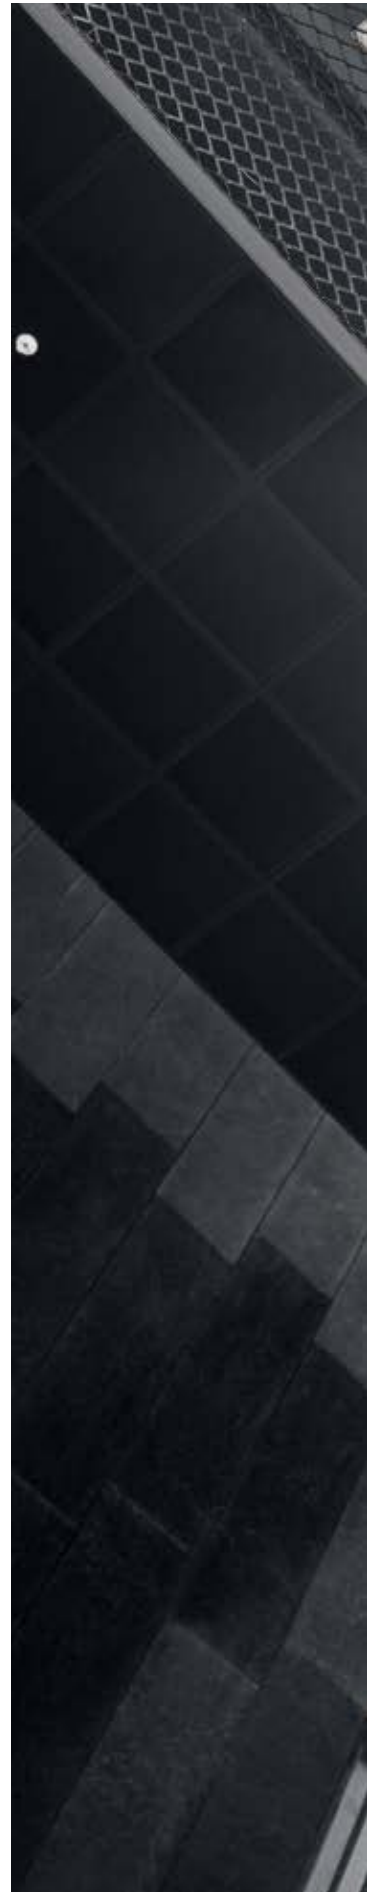

About *Us*

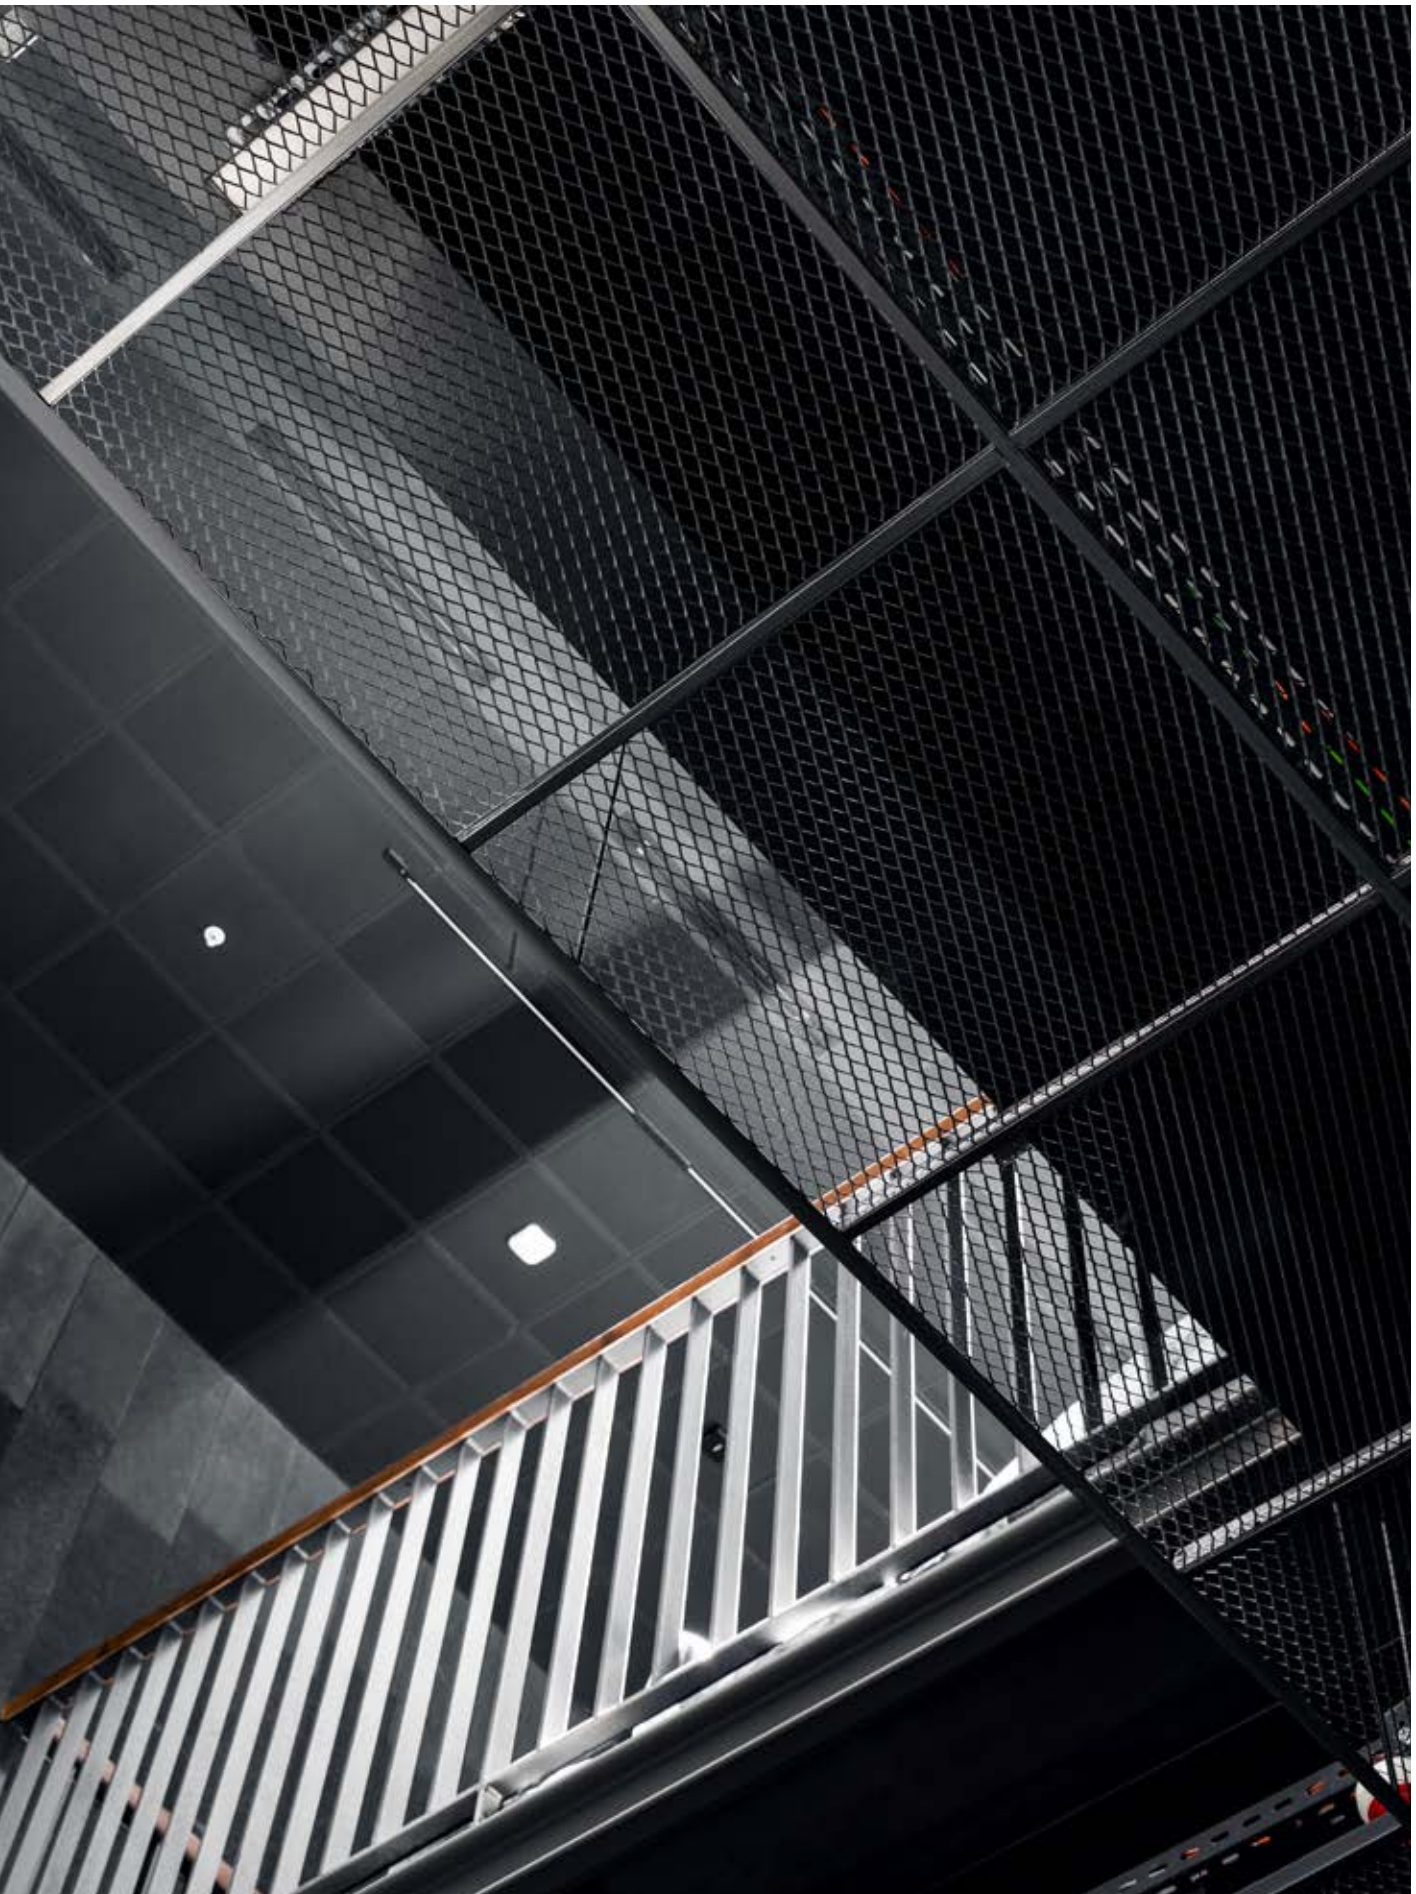

Deckon Commercial Ceilings is a prominent provider of high-quality ceiling solutions for commercial spaces, boasting years of industry experience. Renowned for exceptional craftsmanship, innovative designs, and top-notch customer service, Deckon focuses on creating visually appealing and functional environments.

The company sets itself apart through a commitment to excellence, offering personalized solutions aligned with client visions and budgets. The diverse range of ceiling options includes suspended, acoustic, and metal ceilings and all kinds of suspension system profiles and accessories, sourced from trusted raw materials.

Deckon has placed great emphasis on the distribution process, viewing our dealers as strategic partners in providing the best service to end-users. Today, we solidify our position in the industry by offering ceiling solutions and technical partnership for a wide range of segments, from the smallest projects to the most extensive or specialized, catering to all types of projects and customer requests with suitable products and services.

Prospective clients are encouraged to explore our website and benefit from the expertise of Deckon's skilled professionals.

Leading Suspended Ceiling System Manufacturer

Deckon reinforces its leading position in the industry with advanced production lines and a technological machinery park. Our modern and innovative manufacturing facilities continuously enhance our product quality and efficiency, ensuring that we provide the highest level of service to our customers.

Our high-capacity and automated production lines are designed to meet the requirements of large-scale projects swiftly and flawlessly. Our state-of-the-art machines ensure that our products are manufactured to the highest standards without any errors. Deckon places great emphasis on quality control and continuous improvement processes. By prioritizing quality and innovation at every stage, we aim to provide our customers with the best products.

Deckon's manufacturing facilities are a cornerstone of our success and customer satisfaction in the industry. Our advanced technology production lines and commitment to quality enable us to make a difference in every project we undertake.

Products & *Services*

Deckon Premium Suspended Metal Ceiling Systems

Deckon offers innovative and aesthetic solutions in metal suspended ceiling systems.

Our product range is designed to meet all kinds of needs of our customers.

01.

Cassette Type

Lay-on & Lay-in

These systems provide a modern and aesthetic look while offering easy installation and maintenance. With exposed and semi-cocealed tee.

Standard Clip-in

The concealed carriers create a smoother and uninterrupted ceiling surface.

Clip-in Heavy Duty Nonius

These systems are specially designed for heavy loads and offer high durability.

Hook-on

Deckon's Hook-on System, with its hidden carriers, offers a sleek and uninterrupted appearance in suspended ceilings. Its high acoustic performance makes it ideal for various spaces from offices to conference halls.

Hook-on Corridor

Deckon's Hook-on Corridor system offers an aesthetic and practical solution for corridors. With its easy installation and durable structure, it provides a modern look and long-lasting use for corridors.

Bandraster

Provide solutions suitable for different space needs with flexible installation and adjustability features.

Open-Cell

Tetral Series

Deckon's Tetral Series adds a unique look to spaces with its modern and innovative design. The B, S, and Inverse models in this series create aesthetically striking visual effects, while also enhancing the acoustic properties of the space.

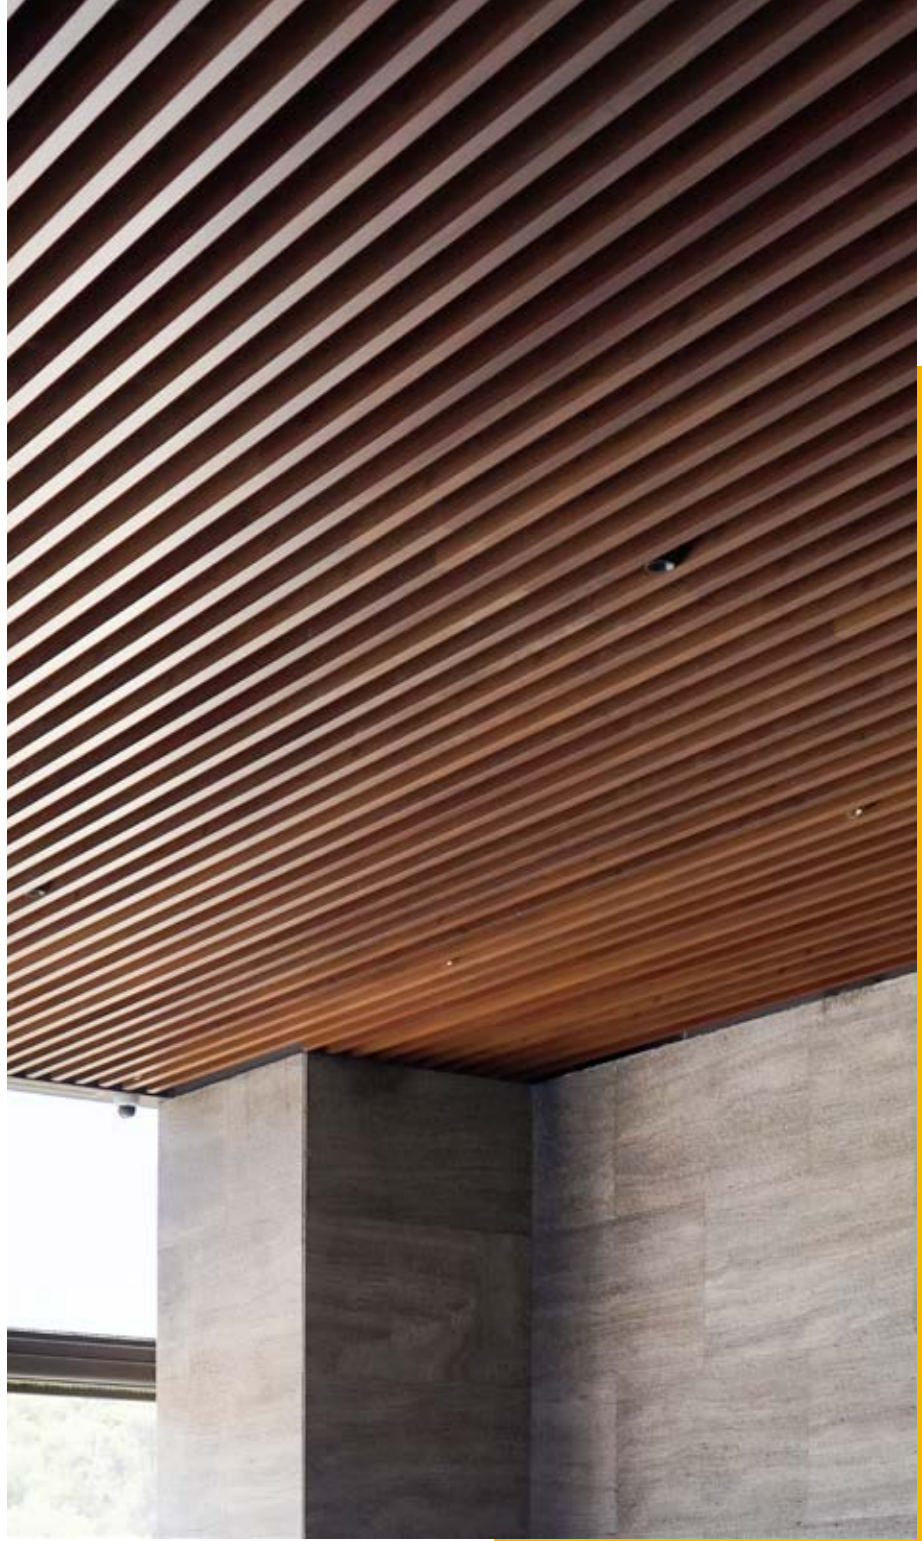

Triangular

The Triangular series, with its triangular honeycomb design, brings a dynamic and contemporary feel to spaces. This eye-catching design offers aesthetic appeal and enriches the overall atmosphere of the space.

Tetral Line & Delta Line

The Tetral Line and Delta Line series combine aesthetic and functional features. These series provide solutions for the acoustic and lighting needs of spaces, offering sophisticated and elegant designs that create a visually stunning appearance.

to spaces with their elegant lines and stylish designs.*

Bespoke Metal Ceilings

Deckon's Bespoke service offers custom design solutions tailored to the unique needs and desires of our clients. Developing unique and personalized designs for each project, this service highlights the character and functionality of spaces. With our customer-focused approach, we guarantee originality and quality at every stage from concept to implementation. With Deckon's Bespoke service, we create innovative and aesthetic designs for your space, going beyond standard solutions.

Expanded Stretch Metal Mesh

Deckon's Expanded Stretch Metal Mesh Panel Systems series bring uniqueness and sophistication to modern architecture. These versatile systems offer aesthetically impressive and functional solutions, making them ideal for both interior and exterior applications. With their durable structure and extraordinary design, these panels can be perfectly applied to all kinds of structural projects.

02.

Expanded Stretch Metal Mesh

Ceiling

Deckon's Ceiling systems blend aesthetics and functionality in interior spaces, creating a visual and structural impact. The Lay-on & Lay-in Type systems offer easy installation and deinstallation, providing a modern look to spaces while facilitating air circulation and natural light permeability. The Hook-on systems, with their hidden carriers, present a sleek and uninterrupted appearance, offering a high acoustic performance and superior aesthetic solution. Specifically designed for corridors, the Hook-on Corridor System combines durability and aesthetic appeal, enriching spaces both functionally and visually.

Facade & Wall

Deckon's Facade & Wall systems create a modern and dynamic aesthetic in the exterior spaces of buildings. These systems blend aesthetics and functionality in outdoor spaces, creating a structural impact. Made from materials that provide durability and energy efficiency, these panels reshape the exterior appearance of buildings and offer long-lasting use. Deckon's mesh facade and wall panel systems emphasize sustainability and innovative designs in architectural projects.

Wood Ceiling and Wall

Deckon's systems perfectly blend aesthetics and functionality in both interior and exterior spaces. The ceiling systems add visual and structural impact to interiors with their modern design, easy installation, and high acoustic performance, while the facade and wall systems transform the exterior appearance of buildings with a modern and dynamic aesthetic.

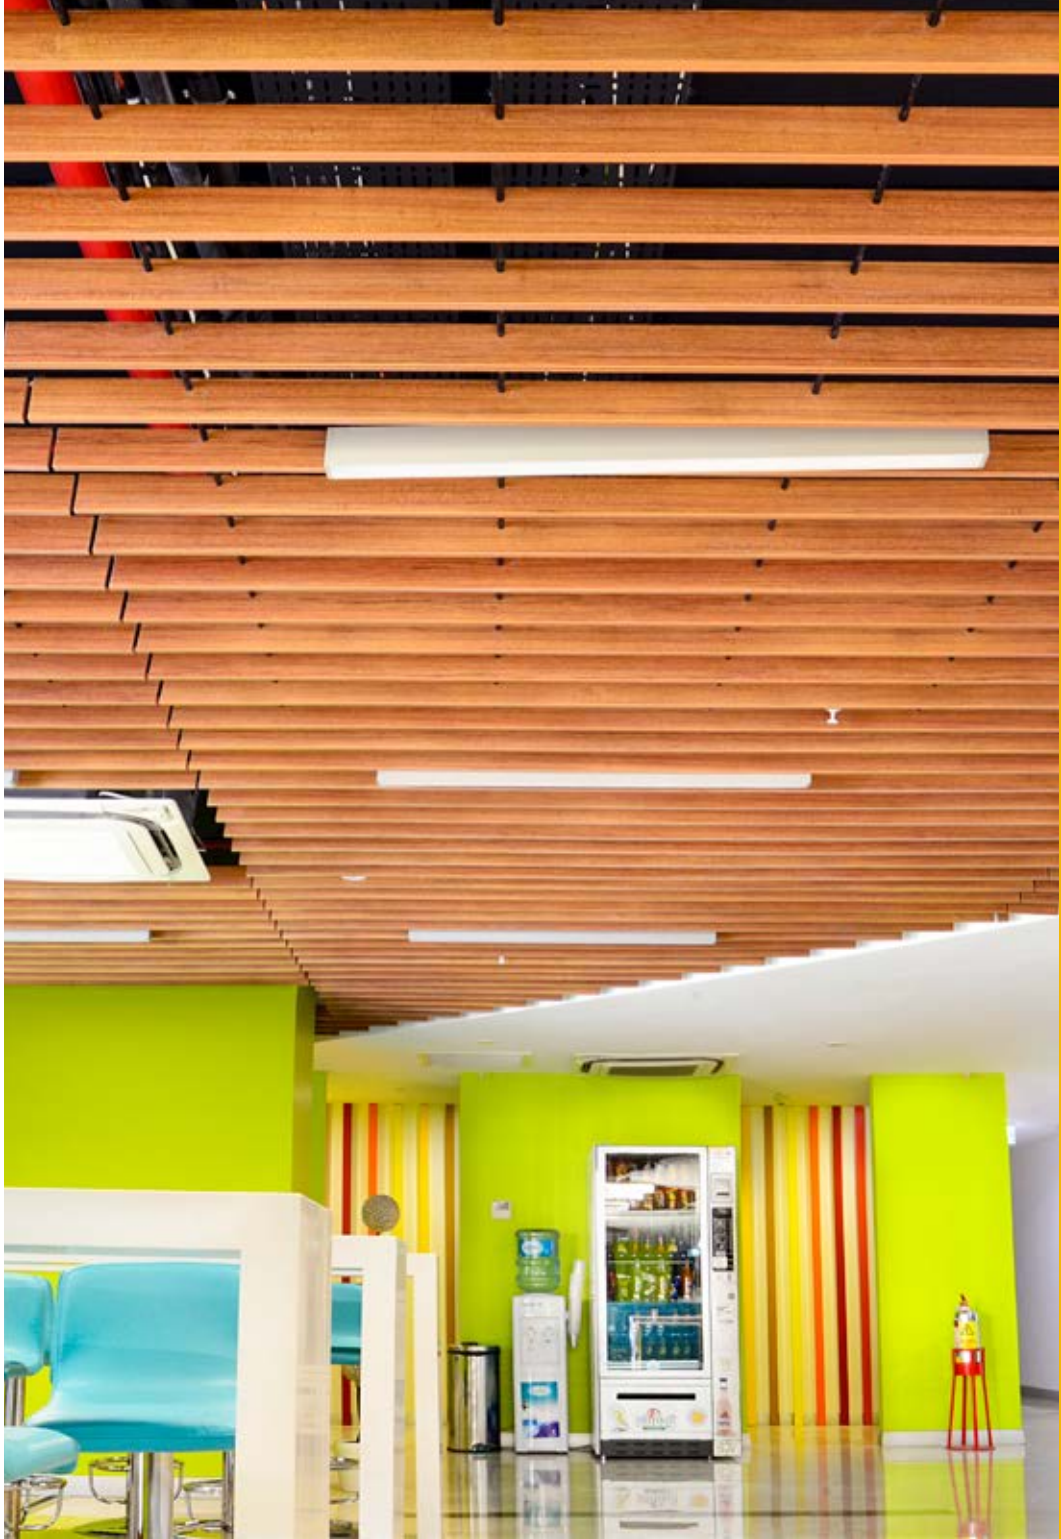

03.

Acoustic Wood Panels

Acoustic Wood Panels offer a natural wood aesthetic that meets the acoustic requirements in various settings, including conference halls and meeting rooms. These panels, available with different perforation options, are effective in sound absorption, blending modern design with practical acoustic functionality.

Linear Wood Ceilings

Linear Wood Ceilings provide a natural look and high acoustic performance for a wide range of applications, from offices to showrooms. These systems consist of modular arrangements of wood slats, offering both aesthetic appeal and functionality. The ease of customization, with various sizes and shapes, allows for creative freedom in design.

04.

Vinyl Coated Gypsum Tiles

Deckon's vinyl-coated gypsum tiles transform interior spaces by combining modern design with practical usability. These tiles, offering a variety of color and pattern options, adapt to all kinds of interior decorations and provide high durability and longevity. Their stain-resistant surface and easy-to-clean feature stand out as a maintenance-free and hygienic solution. Additionally, their sound and thermal insulation properties create comfortable and quiet living spaces. Suitable for every project with various size and thickness options, Deckon's vinyl-coated gypsum tiles save time with their ease of installation and meet both aesthetic and functional needs, appealing to a wide usage area from offices to residences.

05.

Perforated Gypsum Tiles

Deckon's perforated gypsum tiles combine superior acoustic performance with elegant aesthetic design, transforming the atmosphere of spaces. Offering excellent results in sound insulation and absorption, these panels are an ideal choice for various areas such as conference halls, offices, and educational institutions. Their perforated structure, with various hole sizes and patterns, complements modern interior designs and provides long-lasting performance and aesthetic appearance even in frequently used areas. Easy to install and maintain, Deckon's perforated gypsum tiles offer a practical and economical solution, perfectly meeting the requirements of both modern architectural designs and functional needs in every kind of space.

06.

Perforated Gypsum Board

Deckon's series of Fabric-Covered Acoustic Panels adds value to spaces with their aesthetic design and superior sound insulation properties. These panels are ideal for controlling sound and providing visual appeal in modern spaces.

Acoustic Fabric Panels

Deckon's series of Acoustic Fabric Panels adds value to spaces with their aesthetic design and superior sound insulation properties. These panels are ideal for controlling sound and providing visual appeal in modern spaces.

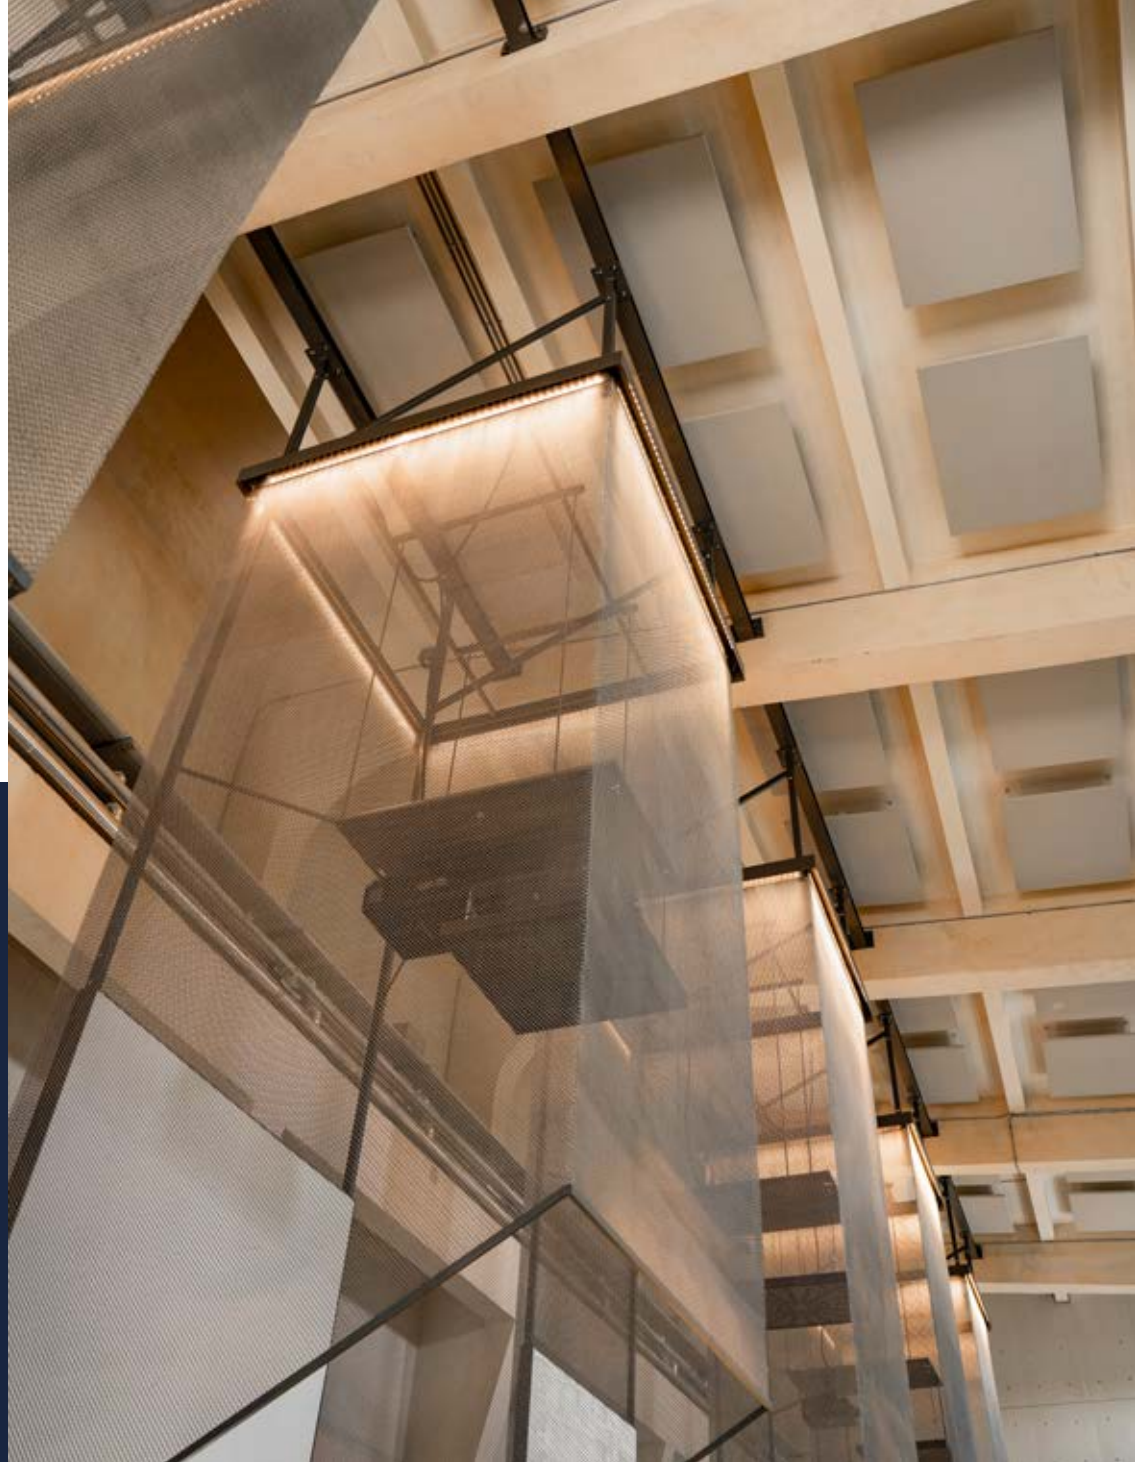

07.

Fabric Baffles

The fabric baffle systems can be used in both ceiling and wall applications, offering an aesthetic appearance. Effective in sound absorption and distribution, these systems are ideal for spaces with high ceilings.

Fabric Islands

Designed especially for open-plan offices and large spaces fabric islands control the focus and dispersion of sound, enhancing acoustic comfort and contributing to the aesthetics of the space.

Suspension System Profiles

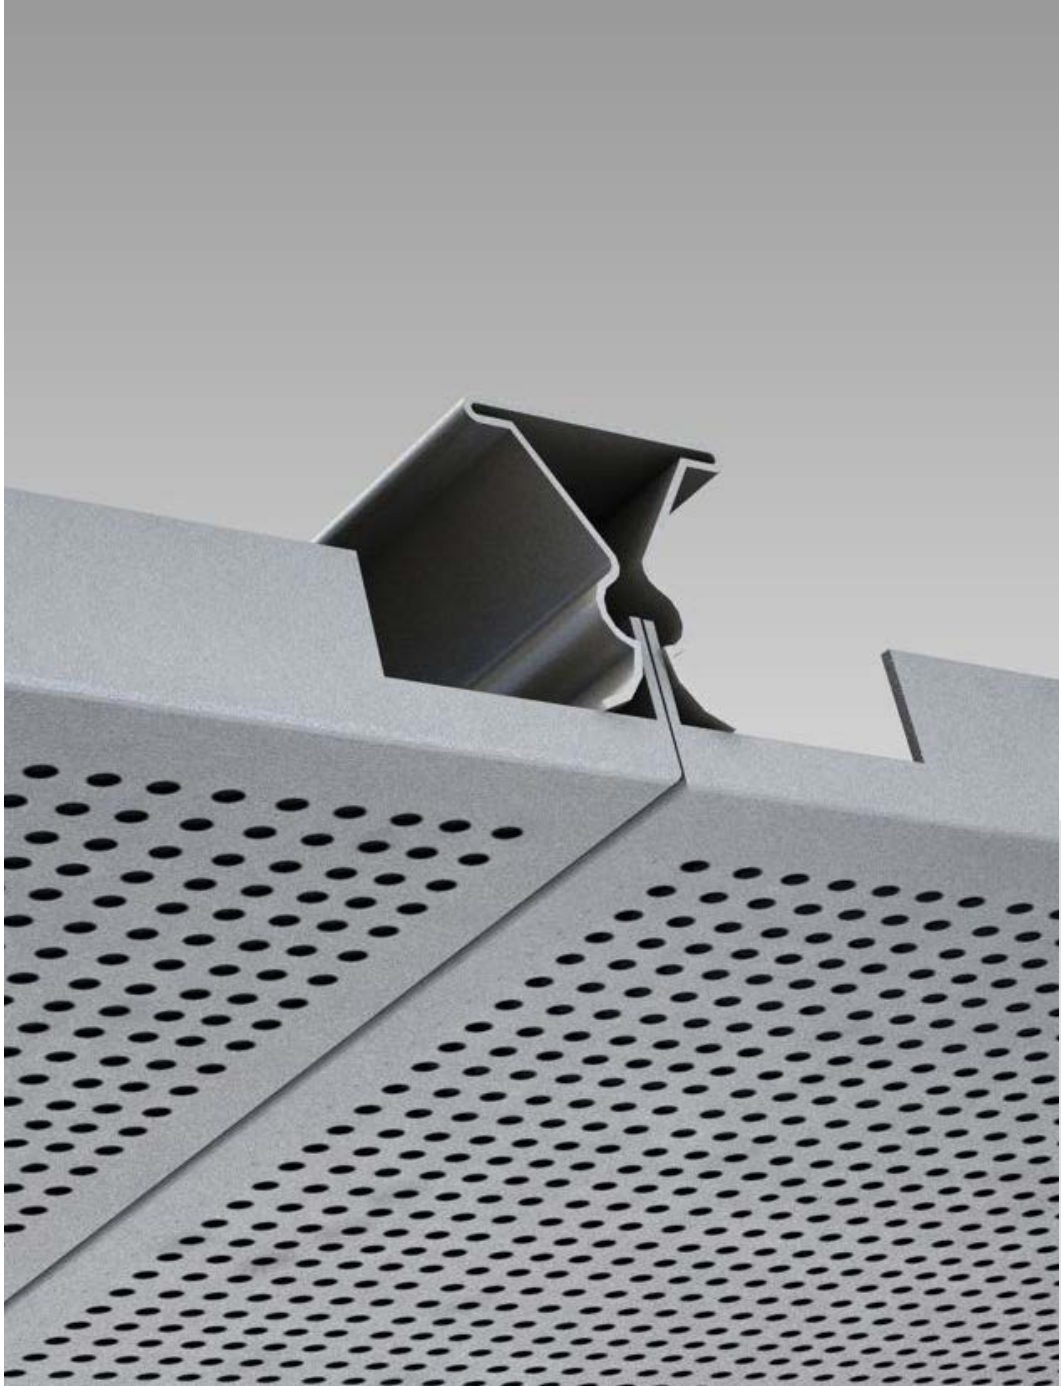

Deckon's range of suspension system profiles offers flexibility and durability to accommodate various space requirements.

08.

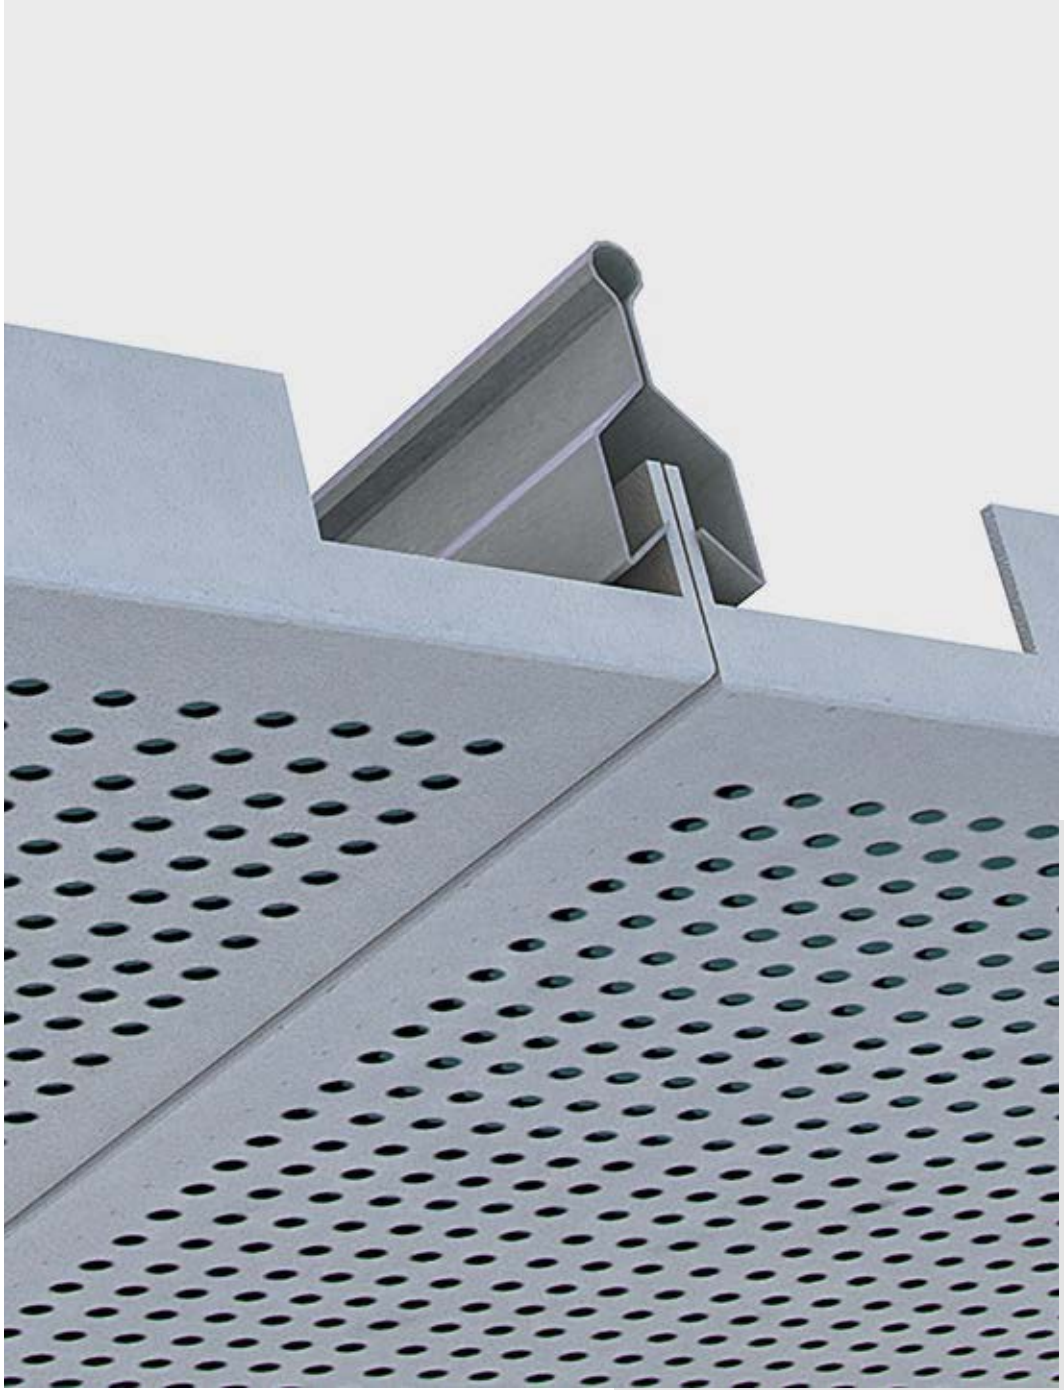

Deckofix® T15/T24

The T15/T24 series, offering a standard modulation profile system, is suitable for elegant and stylish design needs. This series is ideal for designs that combine performance and functionality.

Deckofix® Clip-in Profile

Deckofix® Clip-in Profile, with its concealed carrier system and perfect harmony with Clip-in Metal Suspended Ceiling Tiles, provides a robust, smooth, and aesthetic ceiling appearance to spaces. This system offers a homogeneous look with its modular structure and preserves visual integrity by hiding the carrier profiles. Deckofix® Clip-in profile is an ideal, flawless ceiling solution for modern and stylish environments.

Deckofix® Heavy Duty Clip-in Profile

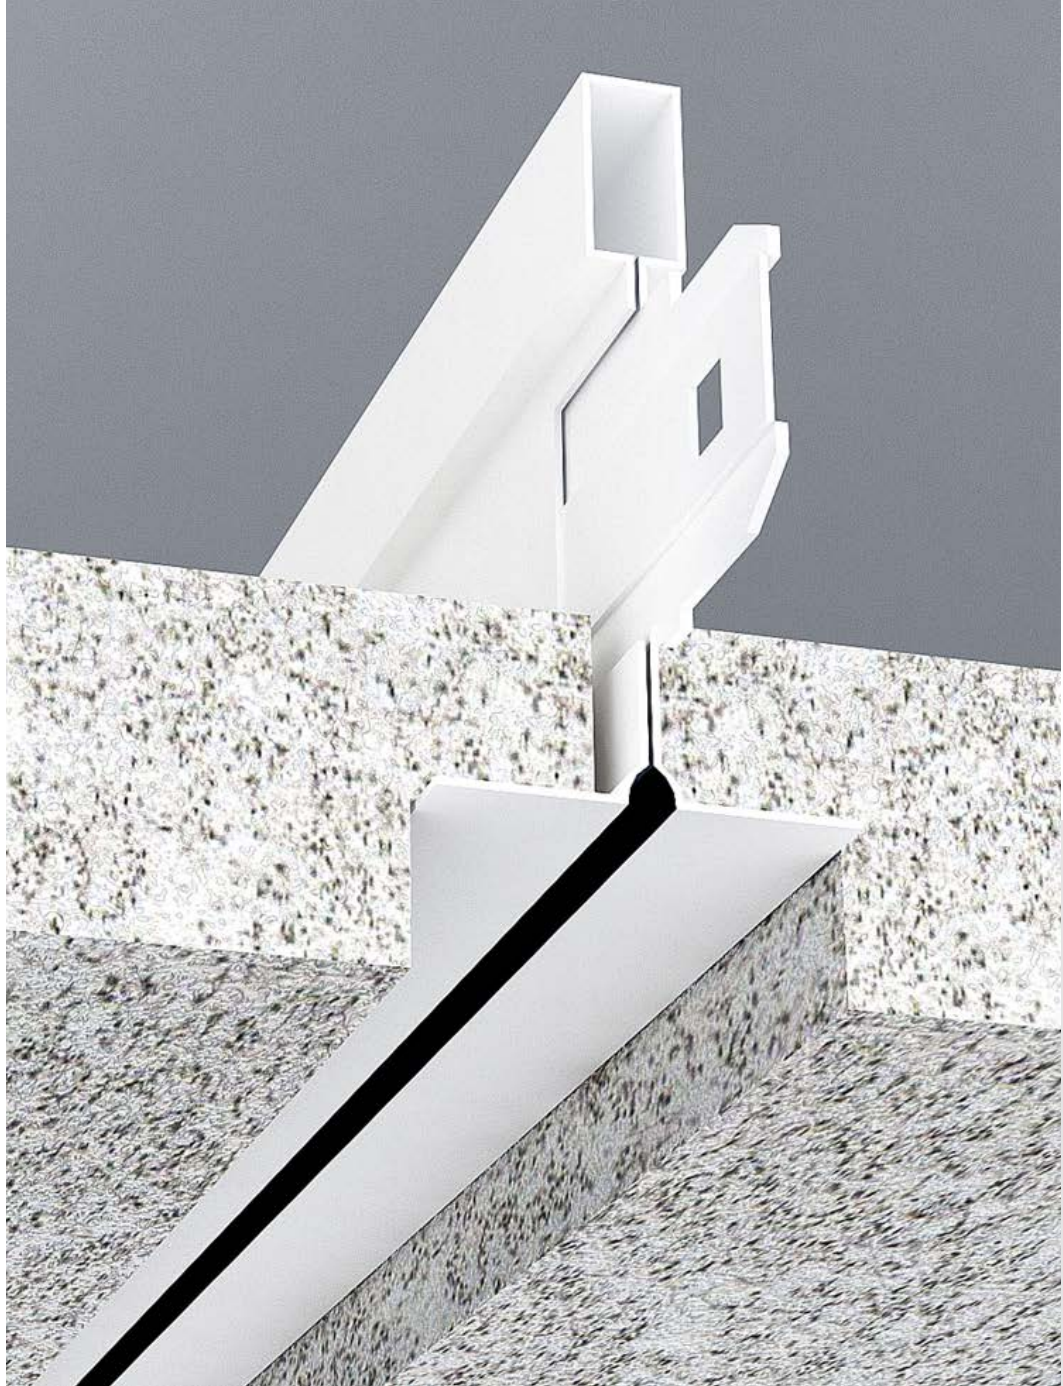

Deckofix® Clip-in HD system consists of a heavy duty rated concealed supporting structure where demountable metal tiles can be clipped into the inverse V shaped main runner. The grid system is not visible thus providing more aesthetical and plain view comparing to the standard visible grid system. All panels are singularly and individually demountable thus enabling easy and fast access above the ceiling.

Deckofix[®] Ultraline

Deckofix[®] Ultraline system is crafted to provide an aesthetic solution to the ceilings. Standing out with its attractive and high end performance, this system aligns with modern architectural design principles. Deckofix Ultraline offers superior comfort and aesthetics, especially in modern office areas.

Deckofix[®] T24 Fut

The Deckofix® T24 FUT system is specifically designed to provide an alternative option to T24 modular ceiling system.

Offering a black line in the middle of the T-profile maintaining an aesthetic appearance, this system is ideal for various spaces ranging from offices to educational institutions.

Deckofix® T24 FUT combines durability and functionality with an aesthetic design, meeting both the comfort and visual needs of spaces.
